

Business Name: [Third World Energy Systems](#)

Your Name: Randy Freese

Business Description:

An Indigenous sustainable/solar energy, clean water, and Food sovereignty startup focusing on solutions for remote, reserve and Northern Indigenous communities.

Third World Energy Systems is an Indigenous Energy Company focusing on Green and sustainable Wind, Solar, Water Capture/reclamation, and Land-based sustainable food sovereignty.

Renewable, Reclamation, Sustainability, Sovereignty

Wind=Air Solar=Fire Water=Water Food=Land

Mission:

Renewable Energy. Sustainable Solutions. Indigenous Sovereignty.

(To bring sustainable and reliable water & energy Sovereignty to our communities)

What We Do (Optional):

(write some information about what your organization does day to day, feel free to use jot form)

- **Renewable:** Emphasizes the use of clean, sustainable energy sources like wind, solar, and water power.
Integrating Energy generation, Clean Water and Food projects to create self-sustaining communities
- **Reclamation:** Highlights the restoration of land through sustainable practices, improving environmental health and supporting community well-being.
Work to reclaim land and Water in our sovereign territories
- **Sustainability:** Focuses on long-term environmental and social responsibility, ensuring that current actions do not compromise the needs of future generations.
Generating clean/green energy for storage and day-to-day use with an end goal of self-sustainability and off-grid energy sovereignty.
- **Sovereignty:** Emphasizes Indigenous self-determination and control over their lands, resources, and energy systems.
Designing sustainable solutions for water filtration, collection and re-distribution
